

How do you approach course design? One traditional approach has been to choose a textbook and then develop a schedule, and course content. This hands-on workshop will allow you to explore another way: begin with writing clear, measurable goals and outcomes and work backward from there.

Workshop participants will be introduced to the concept of backward design and come away with all or part of a course unit plan outlined.

When: Friday, April 3, 2015, 9:00 am -11:30 am

Where: UNM-LA, Room 628

To register, reply to this email (tthompsn@unm.edu)

If you have a course you wish to revise, bring the course outcomes, the chapter, unit or week outcomes (if you have them), and a list of activities and assignments.

Backward design can help ensure your course runs smoothly and increase student success!
